Hello Rob not sure if I have the answer you are looking for but I do have some info CHU transmits from Ottawa Canada on 3330 KHz @ 3KW 7335 KHz @ 10 KW and 14670 KHz @ 3 KW it sends time codes using NRC (ASC II) FSK Time Code at the 60 th minute of each hour at 300 baud . It also identifies in voice every other minute even minutes in English and odd minutes En Francais I have the breakdown as well of the FSK sequence but it is difficult to post. I mostly use the station as propagation indicator to the west keeping in mind that 10 kwatts sure punches through nicely as compared to my 100 watts 73's de VE1BT.... --
